

Sorting and organizing things is an important science skill. Try making these animals or some of your own!

Study these animal patterns and make one or come up with your own creation!

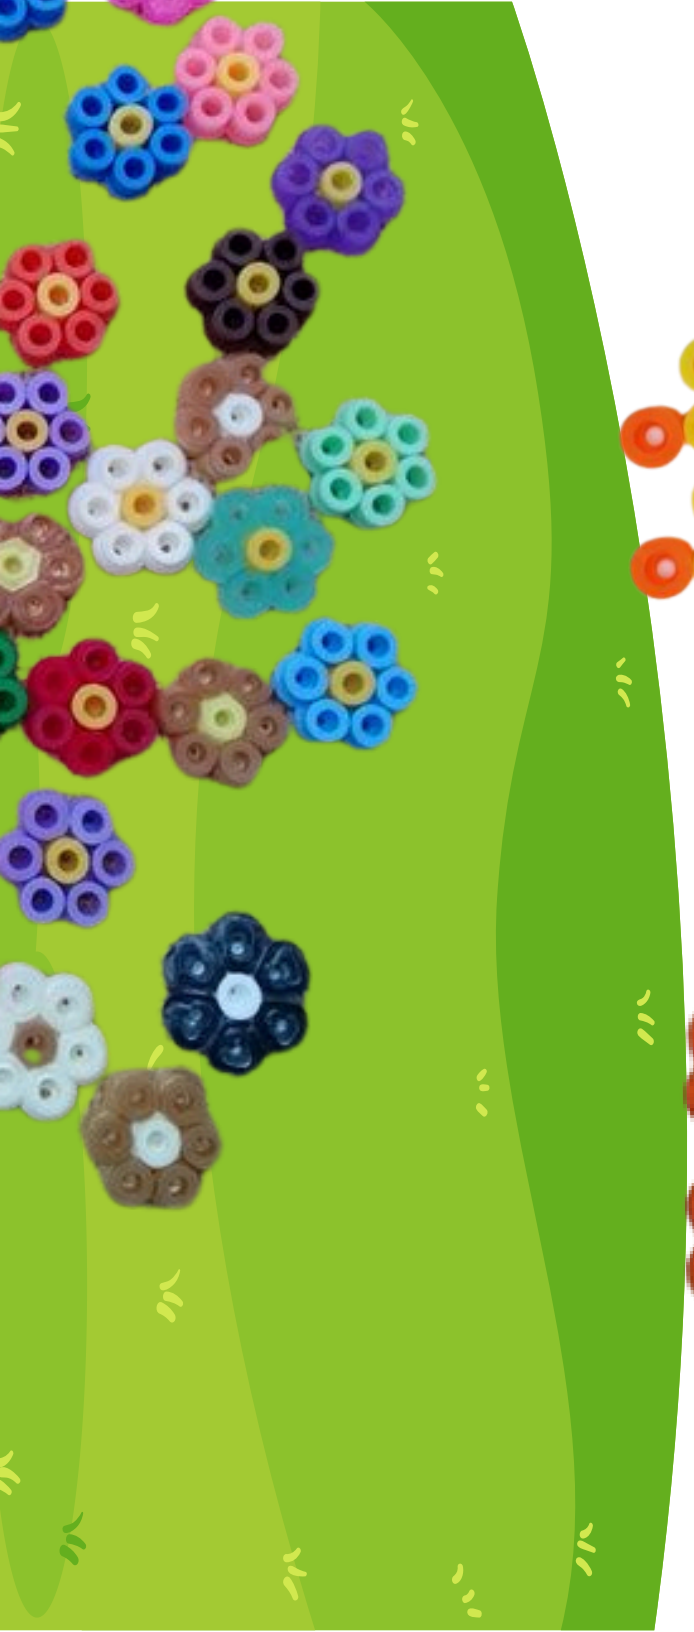

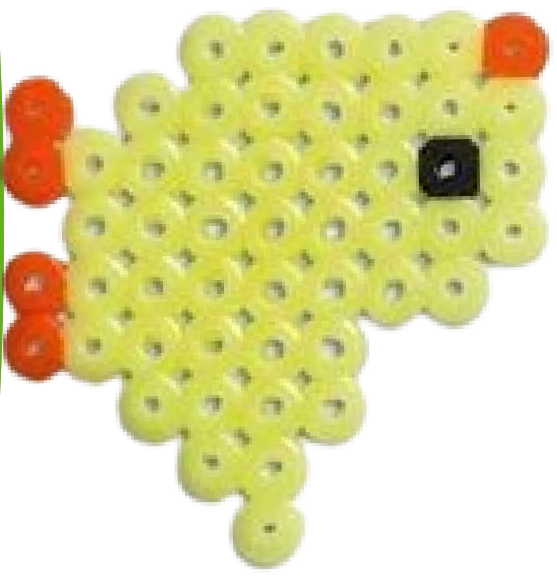

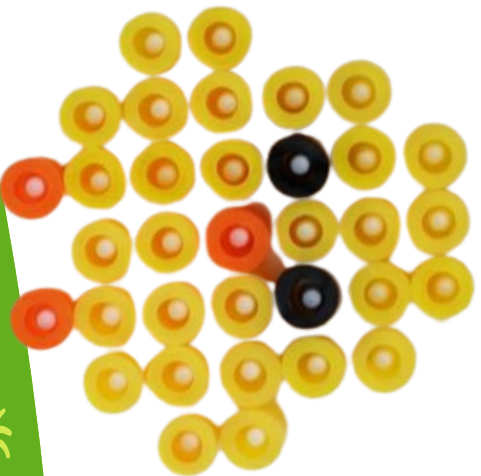

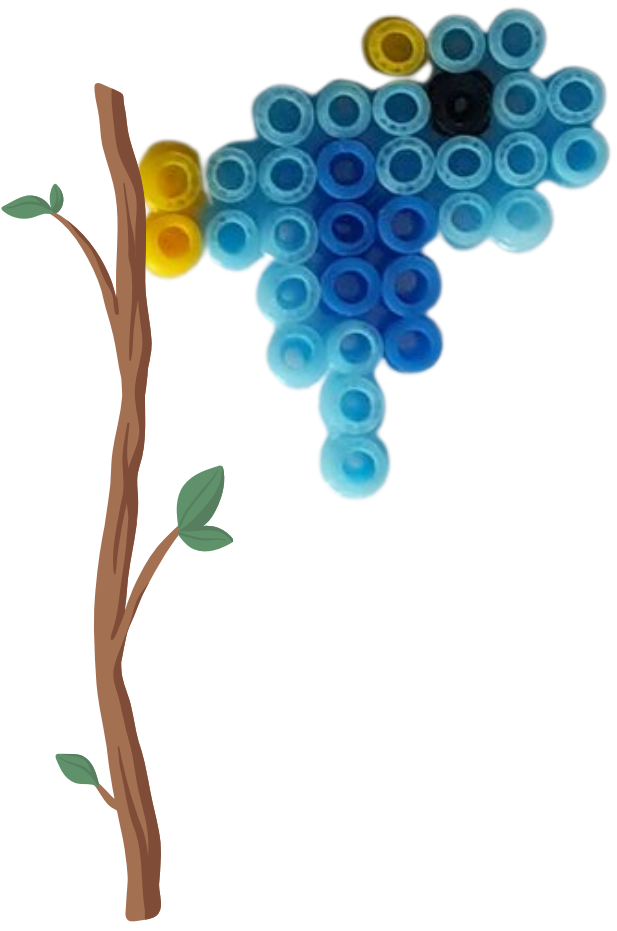

Boil and bubble see if you can make some lab supplies all of your own. Remember when you see bubbling it is one indicator that a chemical reaction is occurring.

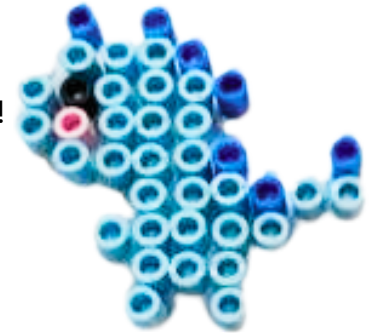

Sorting and organizing things is an important science skill. Try making these animals or some of your own!

Make a Dino!

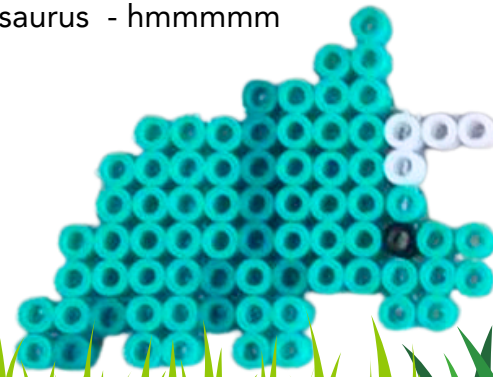

T-Rex, roarrrr!

Sorting and organizing things is an important science skill. Try making these animals or some of your own!
