

Pretend Flight Guide

Objective: Get students excited about pretend play. Let them draw, build, and find items in the classroom to create their own airport and airplane! It's so important for students to use their imaginations. Help them get supplies and take turns playing different roles. Building the plane can take time and be directed by students. Give them ideas, like making the controls for the pilot. Maybe they can draw out the buttons and find a fun steering wheel to use. Enjoy!

Here are some different roles students can play.

If your students can read, then print this for their parts. If they can't read help them with role play.
