

# Moe's Salt Lake Punch Recipe

A good recipe for a shrimp farm is 1400 ml of water to 3 Tbs salt. Follow my recipe below to make it in small batches as a class.

What does salt look like under the microscope?

**Water:** Use Pippi Pipette to fill Tedros Test Tube to 40 ml

**Salt:** Use Scoopy spoon to measure 1 flat spoon of salt

**Dissolve:** Put the salt in the water and stir to dissolve

**Observe:** Note the water level. Did the water level go up down or stay the same

---

---

**Pour:** Pour your Salt Lake punch into Moe the Pitcher.
