

OCEAN BINGO

Set up:

Cut out the squares on the next page to draw out of a hat. For added fun put the cut out squares inside a bingo cage to have students roll and help to choose an animal square to call out.

Instructions:

1. Have the students cut up a piece of paper to create square markers for the game.
2. Pass out the Bingo sheets to each of the students.
3. Randomly draw a calling card and announce it to the class. If the students have the animal that was called on their Bingo sheet, they can mark that square off with their paper markers. Five in a row makes Bingo!
4. If a student calls out Bingo, have them call back each of the ocean animals they have marked off to verify their Bingo.
5. Play as many rounds as you like. Switch the game up and play for blackout where a player wins only once they have marked off all of their squares.

✂ Cut out these squares and randomly draw them to run the bingo game!
